PROFILE

Full-Stack Developer trained at Holberton School Paris (intensive, project-based curriculum), specialised in React, Django / Django REST Framework and Node.js. A former operating-theatre nurse for 3 years, I bring rigour and stress management proven in critical environments, along with a concrete understanding of the healthcare sector. I build reliable, business-oriented web applications, from back-end to user interface. Available immediately, based in the Paris area and open to remote work.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, C

Frameworks & libraries: React.js, Django, Django REST Framework, Express.js

Runtime: Node.js

Databases: MySQL, SQLite, MongoDB, Redis

DevOps & tools: Git, GitHub, Linux, Docker (basics), CI/CD (basics)

Concepts: REST API, MVC, ORM, JWT authentication, unit testing (Jest, unittest), Agile/Scrum, responsive design

SELECTED PROJECTS

Santech — Medical management web application (medtech)

Video demo: youtu.be/XO5b9wKNm84 • Code: github.com/Abbassimedayoub/Santech

Full-stack application for healthcare facilities: medication inventory, employee and payroll management, company/supplier relations, customer requests and billing. React front-end consuming a Django REST Framework API secured with JWT authentication.

Stack: React • Django • Django REST Framework • REST API • JWT • SQLite

Files Manager — File hosting & sharing API

Code: github.com/Abbassimedayoub/holbertonschool-files_manager

REST API with token-based authentication, MongoDB storage, Redis caching and asynchronous thumbnail generation via a queue (Bull). Service-oriented back-end architecture.

Stack: Node.js • Express • MongoDB • Redis • Bull

AirBnB Clone v4 — Full-stack platform

Code: github.com/Abbassimedayoub/holbertonschool-AirBnB_clone_v4

Dynamic front-end consuming a Flask REST API, MySQL persistence through the SQLAlchemy ORM, an object-management console, unit tests and deployment automation.

Stack: Python • Flask • MySQL • SQLAlchemy • REST • MVC

React & TypeScript specialisation

Code: github.com/Abbassimedayoub/holbertonschool-web_react

React / TypeScript projects: components, hooks, state management and build tooling (Webpack, Babel), with automated Jest tests.

Stack: React • TypeScript • Webpack • Jest

PROFESSIONAL EXPERIENCE

Operating-theatre Nurse — Djerba International Clinic, Tunisia • 2019 – 2022

Lead scrub nurse (orthopaedic theatre + emergency on-call duty) in a sterile, life-critical environment.

- Daily preparation and instrumentation of surgical procedures, with a zero-error requirement.
- Emergency management within a multidisciplinary team (surgeons, anaesthetists, scrub nurses) under high pressure.
- Management and preparation of sterile equipment and stock.

Transferable skills: rigour, reliability, stress management, teamwork and a strong sense of responsibility — plus the domain understanding behind the Santech project.

EDUCATION

Bachelor in Software Engineering — Full-Stack Web specialisation • Holberton School Paris • 2023 – 2026 (in progress)

State Nursing Diploma (DEI) • ESSTSS, Sfax (Tunisia) • 2016 – 2019

LANGUAGES & ADDITIONAL

Languages: French (fluent) • Arabic (native) • English (B1/B2, professional)

Additional: Driving licence (B) • Immediately available • Scout leader since 2016 (youth supervision, budget and event organisation).
